PROFILE:

Birthdate: 12 August 1996

Front-End Developer with 5 years of professional experience specializing in **Angular, TypeScript, and RESTful APIs** within global enterprise environments. Proven track record of delivering high-quality internal applications and collaborating with international teams to resolve critical production defects. Currently expanding expertise into **Full-Stack development** by leveraging a strong foundation in **Java Spring Boot, MongoDB, and CI/CD** workflows to build end-to-end software solutions.

EXPERIENCE:

Career Break | Upskilling & Strategic Trading (Side Career)

Family home

May 2025 - Present

- Actively advancing technical foundations in both Front-End and Back-End development through intensive independent study.
- Managed a personal trading portfolio as a side career, applying data analysis and risk management strategies to navigate financial markets.
